Overview of Textiles

Textile often referred to as the backbone of Pakistan's economy as it enjoys around 60% share in total exports by contributing 8.5% to the national gross domestic product and providing employment of around 15 million people directly or indirectly but the cotton crop has disappointed yet again due to substitution and dwindling yields. it's estimated that cotton production will stay around 6.0 million bales (155 kg per bale) in the current fiscal year 2020-21.

The low quality of cotton yield in Pakistan was an impending feature of the textile value-chain even before the substitution with competing crops in fact, we suffer from one of the worst contamination percentages in the world which is more than seven times the international standard primarily due to obsolete and ineffective picking methods. Besides, the below-par pace of seed research is also the reason for dwindling quality output. The world is depending on genetically modified seeds for more two than decades in particular Bt generations, to enhance cotton's productivity and output quality whereas Pakistan's bid to facilitate agricultural productivity through localized research has been abysmally. The delayed and point-blank adoption of these genetically modified varieties was haphazard, unregulated, and in the long term, counterproductive.

We suggest that there is an urgent need for consolidation and standardization in the seed industry of the country along with the need to invest in seed research so that it can better develop strains that are more suited to local climatic conditions and other practical elements. Agriculture policymaking also needs a realignment of priorities as cannibalization of cotton by the competing crops required to be addressed urgently which is the main input for the most important export sector of the country and therefore serves as the basis for critical foreign exchange. The regulators need to understand is that in order to ensure sustainable growth in agriculture, they need to lend support directly to farmers in enhancing productivity.

Establishment of a New Spinning Unit

The board of directors have unanimously approved for setting up a new spinning unit of 13,056 spindles with the production capacity of 450 bags per day approximately in Sheikhupura, Punjab.

Acknowledgement

The Board highly appreciates the contribution of employees, bankers, corporate regulators, stakeholders and other government authorities for their continuous support.

- clarify that to be considered a business, an acquired set of activities and assets must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs;
- narrow the definitions of a business and of outputs by focusing on goods and services provided to customers and by removing the reference to an ability to reduce costs;
- add guidance and illustrative examples to help entities assess whether a substantive process has been acquired;
- remove the assessment of whether market participants are capable of replacing any missing inputs or processes and continuing to produce outputs; and
- add an optional concentration test that permits a simplified assessment of whether an acquired set of activities and assets is not a business.

3.3 Definition of Material (Amendments to IAS 1 - First-time Adoption of International Financial Reporting Standards and IAS 8 - Accounting Policies, Changes in Accounting Estimates and Errors)

The amendments in Definition of Material (Amendments to IAS 1 and IAS 8) clarify the definition of 'material' and align the definition used in the Conceptual Framework and the standards.
